ISO 9001:2015 Quality Management System Awareness Training

Dear All,

As you all are aware, CBS has begun the process of getting Certified to the ISO 9001:2015 Quality Management System. We have engaged CSA Consultants to help us in this approach. As a first step, CSA Consultants will conduct a 2 hour Awareness Training on the Standard for all employees whereby we can obtain:

- A background knowledge on ISO 9001:2015 Standard,
- An overview of the structure of the standard,
- How the documentation is maintained and how to implement the requirements of the standard,
- Understand how to do an audit.

We can also understand

- the principles of a quality management system,
- why a quality management system is important and,
- the advantages of getting certified.

The training will be conducted on last working Saturday of this month i.e. 29.07.2017 from 12:00 pm to 2:00pm at Sky Garden.

All employees are required to attend the training as it is an integral part of the project ISO and the implementation of the management system will be a way of work at TCG. Hence it is necessary for you to obtain knowledge on the same. I am sure you will find the session an interesting and enriching one!
